## EXPERIENCE

**Web Manager**                    **Limo Korea** | Seoul, Korea                    *Oct. 2019—Current*

- Revamped existing webpages, making them responsive and making changes as requested
- Designed and developed webpages end-to-end for departments of Limo Korea while communicating requirements
- Increased company publicity by optimizing online keyword exposure through Naver's advertisement platform
- Quality-tested the newly developed chauffeur-management mobile application with a team
- Translated incoming calls and e-mails from English-speaking clients and internalized the newly designed websites

**Software Developer**                    **CICOM Software** | Los Angeles, CA                    *Nov. 2018—Aug. 2019*

- Implemented new features and bugfixes for the proprietary B2B ERP system following the in-house coding standards
- Spearheaded the migration of frameworks from Angular to Vue.js as well as optimization of a client's codebase
- Applied webpack's HMR and lazy loading features to speed up development and decrease loading time by 40%
- Maintained version control and clear documentation through a git and visual studios workflow

**Freelance Full-stack Developer**          **Sam Costa Productions** | Remote          *March 2017—Dec. 2017*

- Produced a product end-to-end for a programmable advertisement display on a one-man dev team
- Cooperated with employer to interpret client's feature requests and create mockups
- Utilized Node and Express to create back-end architecture that consumes external Raspberry Pi GPIO API calls
- Used HTML, CSS, Bootstrap, jQuery, and electron.js to develop a responsive, mobile-friendly controller GUI

**Software Developer Internship**          **BASIS.ed** | Scottsdale, AZ          *June 2016—Dec. 2016*

- Created and customized webpages for the BASIS proprietary school information system
- Automated the ETL process of data from a SQL database into a Mongo database
- Worked with teams to produce the most efficient methods and models of data to load into databases
- Developed SQL queries to serve data requests incoming from other departments
- Saved thousands of teachers' hours with an SQL survey that simplified filling out bi-annual CRDC surveys

## PROJECTS

**Babble** – Watch videos together while sending messages on the screen                    babbleapp.herokuapp.com

**Hunkybot** – My personal discord bot                    github.com/haroldpark/hunkybot

**Grocer** – Search up recipes and have the ingredients sent right to your phone                    grocerapp.herokuapp.com

**Time Spent on Overwatch** – how much time did I waste on OW?                    timespentonoverwatch.herokuapp.com

**C-Stem Robotics Competition** – Winner of best creative video award, senior division                    http://youtu.be/aNhA4ZyHn20

## SKILLS

**Languages:**  HTML, CSS, Javascript, C++                    **Spoken Languages:**  Native Korean; basic Spanish

**Front-End:**  Vue**,** Angular, Bootstrap, Vuetify, jQuery                    **Back-End:**  Node, Express, SQL, Mongo, Firebase, .NET

**Other Technologies:**  Github, Webpack, Chrome DevTools, Socket.io, Oracle, Raspberry Pi, Electron, Heroku, Jenkins, D3

## EDUCATION

**Hack Reactor**                    Santa Monica, CA                    *2015—2016*
*Immersive Programming Bootcamp*

**The George Washington University**                    Washington, DC                    *2010—2014*
*Bachelor of Science, Biological Sciences, GPA: 3.20*

**Diamond Bar High School**                    Diamond Bar, CA                    *2006—2010*
*Principal Honor Roll, AIME participant, Rio Hondo Architecture Competition Winner*
